PSPages caters for the European PSP owner and is based in the UK. They have just released their 4th issue, containing heaps of game previews, reviews, news etc. In our guide we have full content listings and all the download links, don't miss it.

At the time of writing PSPages have completed 4 PSP e-zines. The complete list of issues can be found on their downloads page. There is also an RSS feed so you can get the latest issues automatically. This feed is installed by default in Sony's Media Manager software.

PSPages changed their look for Issue 2 onwards and are very pleasing and easy on the eye. There is a lot of content to work through too, with bags of game previews and reviews, and quite a lot of nice sharp game screenshots to check out. They also look at accessories for the PSP so they cover all the bases for your potential purchases.

This is a PSP e-zine definitely worth checking out. Click the links below to jump to our summary of contents for each issue.
